

Aluframe creates the interior

Aluframe is a creative and professional interior design tool. It can be used to create advertising walls in stores, to brand office space and even to provide an original flare when bringing privacy to your home. This light aluminium frame with elegant surface finish is perfect for interchangeable graphics, photos or advertising printed on fabric. These help deliver acoustic dampening to the space and can even be backlit with energy-efficient LED lights in order to increase the attractiveness of the graphics.
